

DYNAMIC DEMONSTRATOR IN A NUTSHELL

This **interactive online learning environment** with the visual learning tools provides interactive and **personalized learning experience** that can be crucial for successful online learning. It displays real-life interactive scenarios for further understanding of the concepts of fake news and disinformation.

WHAT IS INSIDE OUR DYNAMIC DEMONSTRATOR ?

Step into the world of disinformation and fake news with our engaging platform. Dynamic Demonstrator will **immerse you in real-life scenarios** where you'll encounter the challenges posed by fake news and disinformation. You'll be tasked with **making critical choices and answering questions** related to these issues, all while receiving immediate feedback to strengthen your understanding of these crucial concepts.

Seven topics are available to be tested in the real-life scenarios stories such as: **Disinformation threats; Disinformation techniques and tricks; Stereotypes and confirmation bias; Opinion vs Facts; Chain mails; Social sites and artificial intelligence; Photomontage and photomanipulation.**

KEY FEATURES

- **Visual interactive tool** that displays real-life interactive scenarios to further enhance understanding of the concepts of fake news and disinformation.
- **Stories** are visually depicted in the scenarios along with a question where the users have to choose among several answers.
- **Feedback** appears immediately for the users to understand the concept behind the answers.
- **The storyboarding** (scenarios and mock-ups) is designed carefully taking into consideration learners' needs, aiming to conceptualize the information that is now displayed in the Demonstrator.

INNOVATION

The real-life scenarios **depict usual online behavioral patterns** in terms of fake news and disinformation of the identified representative user-profiles and learners can more easily interact with the scenarios that they feel familiar with.

IMPACT

The Dynamic Demonstrator assists learners in learning more about fake news and disinformation by engaging them in an interactive approach. Furthermore, the tool serves as a retention tool, aiming to test the already acquired knowledge in a fun and appealing manner.

ACCESSIBLE AND READY TO USE

Easily accessible from any device connected to the internet, our dynamic demonstrator enables effortless learning. No need for installation – just create an account and it's ready to be used. Stand with us in combating disinformation and fake news. Begin utilizing the Break the Chain dynamic demonstrator which is accessible in English, Czech, Bulgarian, Dutch, Greek, French and Spanish languages.

PROJECT PARTNERS MEETING IN PRAGUE

The Break the Chain project team held its third and final face-to-face meeting on **January 25th 2024**, hosted by our coordinator team EDUcentrum in wonderful Prague. At this meeting, we made significant progress in finalising external testing planning and agreed on the next stages of the project: organizing **multiplier events** in all partner countries as well as finalizing our technical products: web application and dynamic demonstrator tools. **We are looking forward to sharing our final results with you!**
